

# WHISSELL PROFILE

## HISTORY

*Whissell Contracting Ltd.* was founded in Calgary in 1970 by Brian Whissell as a water and sewer contractor with a few pieces of equipment and a hand full of guys. Today Whissell operates five divisions, three offices and over 300 employees and more than 300 pieces of heavy equipment, highway tractors and trailers. We continue to expand our company, market, and territory.

### COMMITTED TO QUALITY SINCE 1970

At Whissell, we know that respect is earned. For decades, we have built our reputation as an industry leader with land developers, municipal governments, engineering firms, industrial clients, and construction companies across Alberta.

We provide exceptional value, innovation and project delivery that meets budget, scheduling and quality expectations. From project pricing, to project start-up, through to final acceptance, Whissell's mission is: *"To build the best projects every time."*

### SAFETY

As one of the first Contractors to develop a safety program (1989), Whissell is considered an industry leader in safety. We operate a comprehensive and well documented safety program that is continuously improving with a focus on being proactive. Our program undergoes both internal and external auditing. External audits are performed by peers from within our industry through the Partners in Injury Reduction (PIR) program. We have maintained a PIR Certificate of Recognition since the program's inception in 1991.

Whissell provides General Contracting Services, expertise in Earthwork Construction, Underground Infrastructure Development, Landfill Construction and Management, Environmental Services, Trucking and Hauling Services and Equipment Rentals. Our people combine decades of experience with dedication to respond to the changing

needs of our valued clients. Major clients include land developers, municipal governments, the oil and gas industry and other private sectors.
